

Maybe our President would read more if he wasn't in the dark?

 **MICROSUN**
the light that rises™

Dear fellow Americans,
Don't worry, the President isn't alone,
most of Washington, and many of us
are reading in the dark too.

Ordinary lights turn on, ours rises,
like the sun.*

That's why we call it a Microsun,
the world's most terrific reading lamp.

Delivering 8x more light than your lamp,
Microsun light is optimized for older eyes.

We'll happily donate a Microsun lamp to
the Oval Office, so he can see everything
in a better light, including all of his
tremendous first year accomplishments.

Make America Bright Again!
